

Jonathan Green

FOR THE BEST LAWN IN TOWN

CARSON Chewings Fescue

Variety Name: Carson
Kind: Chewings
Fescue

Genus: Festuca
Species: rubra
commutata

**Experimental
Designation:** RAD-FC3

Carson Chewings Fescue will soon be recognized as one of the best performing fescues in North America. It was developed for its tremendous shade tolerance and designed to blend with the newest and darkest Tall Fescue and Perennial Ryegrasses on the market today. Carson is well suited for lawn application as it is more drought resistant than most turf grasses and can be used in mixtures without being too aggressive. Carson is very fine leaved and will blend well with almost any turf seed for better diversity and problem solving. Looking for something to enhance your turf program, ask for Carson Chewings Fescue.
